SUMMARY

Hello! I'm Daviti. I'm a skilled and passionate developer specializing in ReactJS and React Native. I bring extensive experience and knowledge to building strong and efficient web and mobile applications. I'm well-versed in various web technologies such as TypeScript, JavaScript, HTML, and CSS. I particularly enjoy creating user interfaces that look great and work smoothly. I've refined my skills in using Tailwind CSS to design modern and stylish layouts.

During my 6 months in the software development industry, I've had the chance to work with cutting-edge frameworks and libraries. ReactJS and React Native have been the core of my career. This has allowed me to become an expert in their respective systems, develop complex frontend solutions, and seamlessly switch between web and mobile development. I've contributed to over 20 projects, which has given me a deep understanding of project cycles and collaborative development settings. I'm quick to grasp complicated concepts, which has helped me produce top-notch code and solve tough technical issues. Additionally, I'm skilled in implementing various React hooks to enhance performance and maintainable codebases.

PROFESSIONAL EXPERIENCE

Junior React Native Developer

02/2023 - Present

4twiggers

Tbilisi, Georgia

- I've built and optimized engaging user interfaces using React Native
- I've collaborated with cross-functional teams to deliver new features
- In my role as a React Native developer, I've successfully implemented complex state management solutions within the 4twiggers app
